Turning Research Into Impact

Spin-outs Denmark
is a programme that **supports** entrepreneurial early-career researchers who want to **create impact** and **start a company** based on research results

The Spin-outs Denmark Grant

What you receive:

- One year of funding for salary, operational costs and overhead
- Entrepreneurship and pitch training
- Support from a Business Developer / Innovation Partner
- Mentoring from an experienced entrepreneur

What this enables you to do:

- Dedicate time to develop your research-based idea / invention
- Explore the commercial potential
- Create a stronger foundation for future funding and launching a spinout

A BUSINESS DEVELOPER

You will be assigned a dedicated business developer from your university who will guide and support you throughout your journey in Spin-outs Denmark

MENTORING

You will be matched with an experienced entrepreneur or industry expert who will provide valuable guidance and support throughout your Spin-out journey

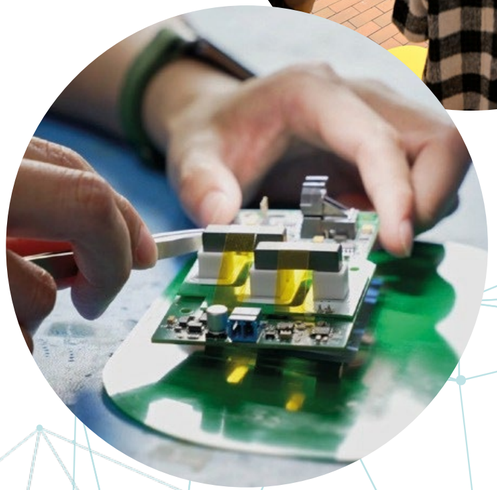

MASTERCLASS & PITCH TRAINING

You will take part in a Masterclass combining four days of entrepreneurship training with online peer-to-peer sessions and a dedicated Pitch Week, where you will refine your pitch and present it to a panel of investors and experts

How to Apply

You can apply to the programme if:

- Your idea and research results have commercial and societal impact potential
- You are employed by one of the Danish universities
- You are qualified for a postdoc position or equivalent
- Your application is endorsed by your department and KTO

Researches from all disciplines are eligible to apply

Reach out to the Spin-outs Denmark project manager at your university to learn more about the application process
